"This was another strong quarter for Cross Country Healthcare. We not only exceeded our guidance but we achieved our targeted fourth quarter goal for a 5.0% Adjusted EBITDA margin one quarter ahead of schedule. Our revenue growth, pricing improvement and cost optimization initiatives are all on track and contributed to these results," stated William J. Grubbs, President and Chief Executive Officer. Excluding the results of the education seminars business that was divested August 31, 2015, revenue would have been \$192.6 million, an increase of 5% year-over-year, and Adjusted EBITDA would have been \$12.9 million, or 6.7% of revenue. Quarterly Business Segment Highlights

Nurse and Allied Staffing

Revenue from Nurse and Allied Staffing increased 6% year-over-year and 3% sequentially. Contribution income in this segment was \$16.3 million, up from \$12.7 million in the prior year. The year-over-year increase in segment revenue and contribution income was due to both organic growth and improved gross margins. Average field FTEs increased to 6,646 from 6,407 in the prior year. Revenue per FTE per day was \$257 compared to \$251 in the prior year, reflecting higher average bill rates.

Physician Staffing

Revenue from Physician Staffing decreased 3% year-over-year and increased 4% sequentially. Contribution income was \$3.2 million, up from \$1.5 million in the prior year due to improved gross margins and lower SG&A expenses. Compared to the prior year, total days filled decreased to 20,543 from 22,100 while revenue per day filled increased to \$1,505 from \$1,432.

Other Human Capital Management Services

Revenue from Other Human Capital Management Services was \$7.4 million, a decrease of 19% year-over-year and 27%

sequentially. The year-over-year decrease was due to one less month of revenue from the education seminars business, partially offset by growth in the search business which was up 30% year-over-year. Contribution income was \$0.4 million, compared to a loss of \$0.1 million in the prior year.

(a) On August 31, 2015, the Company completed the sale of Cross Country Education, LLC, to PESI, Inc. The Company recognized a pre-tax loss of \$2.2 million related to the divestiture of the business. In addition, the Company recorded a benefit of \$3.5 million from the reversal of valuation allowances associated with this business, resulting in an after-tax gain of \$1.3 million.

(b) Acquisition and integration costs in the three and nine months ended September 30, 2015 are primarily related to due diligence efforts for the Mediscan acquisition that closed on October 30, 2015. For the three months ended June 30, 2015, acquisition and integration costs were primarily related to the June 2014 acquisition of MSN. In the nine months ended September 30, 2014, acquisition and integration costs were from both the MSN acquisition and the December 2013 allied healthcare staffing business acquisition. The results of these acquisitions have been included in the Company's consolidated statements of operations since their respective dates of acquisition.

(c) When applying the if-converted method to our Convertible Notes, 3,521,126 shares related to the Convertible Notes, issued in June 2014 in conjunction with the MSN acquisition, are not included in diluted weighted average shares for all of the periods presented because their effect was anti-dilutive.

(d) Adjusted EBITDA, a non-GAAP (Generally Accepted Accounting Principles) financial measure, is defined as net income (loss) attributable to common shareholders before depreciation, amortization, interest expense, income tax expense (benefit), acquisition and integration costs, restructuring costs, loss (gain) on derivative liability, loss on sale of business, other expense (income), net, equity compensation, and net income attributable to noncontrolling interest in subsidiary. Adjusted EBITDA should not be considered a measure of financial performance under GAAP. Management presents Adjusted EBITDA because it believes that Adjusted EBITDA is a useful supplement to net income (loss) attributable to common shareholders as an indicator of operating performance. Management uses Adjusted EBITDA as one performance measure in its annual cash incentive program for certain members of its management team. In addition, management monitors Adjusted EBITDA for planning purposes. Adjusted EBITDA, as defined, closely matches the operating measure typically used in the Company's credit facilities in calculating various ratios. Management believes Adjusted EBITDA, as defined, is useful to investors when evaluating the

Company's performance as it excludes certain items that management believes are not indicative of the Company's operating performance. Adjusted EBITDA Margin is calculated by dividing Adjusted EBITDA by the Company's consolidated revenue.

(e) Adjusted EPS, a non-GAAP financial measure, is defined as net income (loss) attributable to common shareholders per diluted share (reported EPS) before the diluted EPS impact of acquisition and integration costs, restructuring costs, loss on sale of business, and loss (gain) on derivative liability. Adjusted EPS should not be considered a measure of financial performance under GAAP. Management presents Adjusted EPS because it believes that Adjusted EPS is a useful supplement to its reported EPS as an indicator of operating performance. Management believes it provides a more useful comparison of the Company's underlying business performance from period to period and is more representative of the earnings capacity of the Company. For the three months and nine months ended September 30, 2014, the adjustments to reported diluted EPS had the effect of converting the net loss to net income. As a result, potentially dilutive shares that were excluded in the unadjusted per share calculation have been included in the adjusted weighted average common shares outstanding - diluted.

(f) Segment data provided is in accordance with the Segment Reporting Topic of the FASB ASC.
